The Virtual Selection Room

There are several items that are covered in making arrangements. Our goal is to make the arrangement process as simple as possible, while still allowing you to select the type of service and items that best meet your needs.

The process will include collecting vital statistics. This will assist in writing the obituary for the newspaper. Also, the type of service, the clergy for the service, and the timeframe will be established. The final disposition will be discussed. In addition, you will view a selection of caskets, vaults, urns, keepsakes, and memorial markers from which to choose.

Viewing

64

For some families, the viewing is a step in the emotional recovery process. This gathering, whether private or public, of family or friends surrounds you with the support and understanding you need. While the viewing is not necessary for all families, it can assist in the grieving process.

Wood Caskets

64

This North American hardwood is known for its distinctive grain along with an unsurpassed strength and durability. Maple is a favorite hardwood in the home furnishing industry.

Many of the same characteristics that make it appealing for use in the home also make it popular for use in casket construction.
